

Dear Medicare Patient,

Medicare requirements for performing Pap Smears allow us to perform pap smears only every other year unless a patient is considered high risk. Unless we can document that you are a high-risk patient, you may be charged for pap smears that Medicare would otherwise cover.

Please assist us by marking which risk factors would apply to you:

- Early onset of Sexual Activity (Under 16 years of Age)
- Multiple sexual partners (Five or more in a lifetime)
- History of sexually transmitted diseases (Including HIV infection)
- History of having been exposed to DES

Thank you.
